FLUKE networks®

Pocket Toner® NX8 Deluxe Kit

Test voice, data and video cables for open and short circuits, continuity and voltage

Quickly and easily test coax, telephone, home theater, audio, video, security and fire cables for continuity, AC and DC voltage, shorts, opens and 50-75 Ω termination—8x faster with 8 ID caps.

Simply place each of the numbered ID caps on the remote ends of the cables to test then connect the main unit to the other end of the test cables one at a time. If there is continuity, the green LED on the ID cap will light and the main unit will show the ID cap's number (1-8) on its digital display. In addition, the audible indicator in the main unit will emit a short tone. PTNX8 also tests for the presence of both AC and DC voltages from 6v-52v.

Features

- Test cables 8x faster with 8 ID caps—with LED to indicate continuity
- Low-voltage circuit protection (6v-52v) in main unit, toner unit and ID caps
- Eight segment LED displays five different test results
- Main unit "beeps" when line condition changes
- Bi-gender toner unit with removable *Speed 81™* coupler
- Two buzzers to indicate continuity
- Test dial tone and polarity with Dial Tone Detective™
- Auto shut-off feature extends battery life
- One-year limited warranty

What's in the kit

- Pocket Toner® NX8
- 8 ID caps
- 66 block adapters
- RJ-11 adapter
- RJ-45 adapter
- Dial Tone Detective™
- Alligator clips and RJ-45 adapter
- BNC-male adapter
- BNC-female adapter
- RCA-male adapter
- RCA-female adapter
- F-female coupler (F-81)
- F-male coupler (F-71)
- F-female coupler (Speed 81™)
- F-male push-on adapter
- AAA battery
- Deluxe case with belt clip

8x Faster

Test Results Display

Display	Meaning
-	Blinking [-] indicates an open circuit
5	Blinking [S] indicates a short
r	Solid [C] indicates continuity with either a 50-75 ohm ID cap or the toner unit
8	A solid matching number indicates continuity with one of the 8 ID caps
4	Blinking [⚡] indicates AC voltage (>6 volts) / Solid [⚡] indicates DC voltage (>6 volts)
