L-com Global Connectivity

Armored IP68 Industrial Ethernet Cables

Stainless Steel Metal Armor

L-com's metal armored TRD8RGMT series is designed for use in outdoor, industrial and military applications. These rugged Ethernet cable assemblies are built using our IP68, ruggedized RJ45 plugs and jacks. The Category 5e cable is double shielded, high-flex, UV and oil resistant and made with a FR-TPE (Flame Retardant Thermoplastic Elastomer) jacket that is CMX outdoor rated. Metal armor protects the cable from impact damage and features 1,500 pounds per square inch of crush resistance. Superior shielding of both the cable and connectors ensures data transmission rates up to 1 Gbps. These rugged cables are resistant to moisture, dust, oil, UV exposure and impact damage.
